5 unique key reasons to invest with Katana Capital:

- The Katana fund is an “all opportunity / broad-cap” fund – Katana has aimed to remove the constraints on market capitalisation. Our mission is to look for opportunities across the entire ASX.
- Cash Flexibility. Our mandated range of 0% to over 50% Cash in the portfolio allows us to be flexible. Our core focus is on capital preservation and generating the best risk adjusted returns.
- Pays a regular income stream. The Katana fund pays a quarterly dividend to investors where as many other LICs are half yearly.
- Katana currently trades at a discount to Net Tangible Assets (NTA). This presents a unique opportunity to invest in a proven, long standing investment company at lower than NTA.
- Katana does not hug an index. Katana is a benchmark unaware investment fund. Our universe of investable stocks is larger than most; this results in having a portfolio rolling 3yr Beta of approximately 0.60.

“Katana is style agnostic and benchmark unaware. This provides the opportunity to outperform based on the size of our universe, our ability to deviate from the index, our ability to hold cash and overall lack of artificial restrictions. We take a macro overlay approach to determine weighting to equities or cash, opportunities in specific sectors and themes and then use bottom up analysis to drive investment into specific companies. We have a sustainable competitive advantage because we are not limited by index tracking, company size, sector or theme. We also have an ability to move to over 50% cash.”
